

WEIGHT LOSS ESSENTIAL OIL BLEND

Although essential oils have been used for ages, we still know little of the remarkable benefits these oils entail for us. Revelation 22:2 says: *"The leaves of the trees will be for the healing of the nations."*

WEIGHT LOSS ESSENTIAL OIL BLEND contains Grapefruit, Lemon, Peppermint, Cinnamon and Ginger essential oils. All these oils activates the systems in your body supporting body weight. For instance, Dr. Alan Hirsch, M.D. discovered during his studies at the University of Chicago that inhalation of therapeutic grade peppermint oil satisfies the brain's satiety center where food cravings originate. His research revealed that peppermint oil stimulates the hypothalamus gland to curb appetite.

HOW TO USE

The best and surprisingly easiest and safest way is by using your diffuser. Take it to your office, use it for 20 minute each morning and in the afternoon. Just by inhaling this incredible blend, the therapeutic molecules will do its work in activating the systems supporting weight loss. (Add 4-5 drops to your diffuser)

Caring for your essential oils: Essential oils and carrier oils are vulnerable to heat, moisture, air and light. Store in a cool, dark place with lids well sealed.
